Tullycarnet Boxing Club

CLIENT

DJ Electrical Services / Tullycarnet Boxing Club

DETAILS

- COMMERCIAL SECTOR
- ATKORE MARCO MTD3 & DDA 1&2-GY
- JUNE 2022
- BELFAST

DESCRIPTION

The aim of this project was to provide a new purpose built Community Boxing Club in Tullycarnet, East Belfast.

This Belfast City Council grant aided project was designed by Dynamic Design, Banbridge.

Gareth Howes, Technical Sales Manager at Atkore Unistrut & Marco stated, "I know this Boxing club and it serves it's local community very well so I was glad to hear our MTD3 trunking was used by DJ Electrical. Derek is a great supporter of our Marco product and was happy with the finished installation as was the designer and the end user."

The project consisted of a stand alone building with a full size boxing ring, training and changing facilities.

SOLUTION

By installing the Atkore Marco Dado trunking, this provided power and data to the office and kitchen facilities of the club.

Atkore Marco trunking is our go-to product when we're asked for to install PVC trunking. It's well designed, easy to install and locally stocked through WS Mercer Ballymena.

- Derek Johnston owner of DJ Electrical
