NAME OF PROJECT

Bangor Health Centre

CLIENT

KMDL Engineering (NI) Ltd/Southern Health & Social Care Trust

DETAILS

- HEALTHCARE
- Marco ME3
- July 2022
- NORTHERN IRELAND

DESCRIPTION

Refurbishment of consultant rooms at Bangor Health Centre, Bangor, Co. Down, Northern Ireland.

Gareth Howes - Technical Sales Manager testimonial:
Jonny Stevenson from KMDL Engineering (NI) Ltd was the contracts manager on this project. Jonny described to me at the start what size of project it was and how many data cables would be needing housed in the trunking. All this info led me to recommend our ME3 trunking. I had to get a sample of ME3 for him to show the M&E engineer and then the client along with a data sheet of the product. We then had to arrange a competitive quote and provide one of our local stockist wholesalers to supply the products.

KMDL Engineering (NI) Ltd are great supporters of the Marco brand. They give me feedback on a regular basis. I was able to recommend our products with confidence as the ME3 product has been used in many Healthcare, Office and Educational projects in N. Ireland. Marco is becoming more and more the go to manufacturer for many Health Trusts here in N. Ireland.

CHALLENGES

One of the challenges was the 3 compartment dado, due to the versatility of where sockets and data outlets could be mounted and later added to if required.

KMDL Engineering (NI) Ltd and the team had to provide samples and data sheets on the product before we got approval.

ME3 provided enough room for the Cat6a cabling on the project.

“

Marco ME3 has been our go to trunking for a while. It is stocked locally. ME3 dado trunking looks well and is installer friendly. We especially like the Cat6a adjustable bends. The clean white finish of ME3 looks well in the hospital setting and we got all the technical back up requested from Atkore/Marco regarding Technical Submission and Data Sheets etc.
Jonny Stevenson - KMDL Engineering (NI) Ltd
