

## ABOUT

Atkore Marco has supplied Apollo uPVC 3 Compartment Dado trunking with DDA centre lids as part of the office refurbishment at Clarke Facades in Ballymena, Northern Ireland.

### NAME OF PROJECT

Office Refurb at Clarke Facades

### CLIENT

BK Electrical / Clarke Facades

### DETAILS

- INDUSTRIAL SECTOR
- ATKORE MARCO APOLLO DDA MTD3LGL
- JULY 2022
- BALLYMENA

## DESCRIPTION

This project required the refurbishment of offices at Clarkes Facades.

Atkore Marco were able to offer DDA compliant Light Grey Center Lids of the Apollo uPVC Trunking to comply with DDA/Part M regulations.

Gareth Howes, Technical Sales Manager at Atkore Unistrut & Marco states, "This project was changed from a competitor because Atkore Marco can supply the trunking with a light grey centre lid to comply with DDA regulations. Local wholesaler WS Mercer, Ballymena keep this product in stock and supplied BK Electrical on this project."

# CHALLENGES

The client asked for dado trunking around the office walls to future proof for any additional power or data requirements.

Atkore Marco's uPVC Trunking was the perfect solution to solve this challenge.

*BK Electrical like the MTD3LGL trunking because the light grey centre lid means we don't need to fit coloured sockets or use the coloured surrounds to comply with Part M DDA regulations. The trunking looks well is easy to install and is kept in stock locally should we require anything else in a hurry.*
