

Lismore Comprehensive School

ABOUT

A large comprehensive school rebuild based in Craigavon just outside Belfast. Lismore is the learning hub of more than 1100 pupils.

NAME OF PROJECT

Lismore Comprehensive School

CLIENT

Harvey Group/SELB

DETAILS

- EDUCATION
- VARIETY OF UNISTRUT AND MARCO PRODUCTS
- JULY 2022
- IRELAND

DESCRIPTION

This innovative and exciting new build school caters for 1200 pupils within a diverse teaching curriculum and was designed to be delivered in 2 phases on the existing site whilst the original school remains fully operational. The 15,800m² design achieves high standards in educational, operational & sustainable performance whilst providing a full range of teaching accommodation suitable for a modern 1200 pupil co-ed school incorporating enhanced sports hall & Gym (700m²). Plan arrangements are flexible thus facilitating a range of events and exhibitions in support of the key school activities.

Gareth Howes- Technical Sales Manager
testimonial:

"I was pleased we won this project as it was a big project in N.Ireland and a lot of our competitors were chasing it. Core Distributions relationship with the contractor and the local stock certainly were a big factor getting this prestigious project over the line. It has also lead to Harvey Group ordering more Atkore products for a further project in London."

CHALLENGES

Space on site was a massive challenge so transporting and fitting 3 meter lengths around the site proved a challenge. Complicated cable runs where Unistrut tray was used was another issue but Core Electrical kept stock locally which enabled the contractor to make any alterations required in a matter of days.

“

Unistrut tray and trunking were used by Harvey group for the first time in N.Ireland kept in stock by local distributor Core Distribution Ltd. The contractor kept adding to the original order due to changes in runs on site and Core were always able to supply through WS Mercer, Belfast. We are pleased with the finished product and received good feedback from the contractor on the quality of the Atkore products used and the ease of installation..
