

Mast House Project

ABOUT

Atkore Unistrut & Marco supplied a variety of Metal Framing and Cable Management solutions as part of the Mast House Project in Plymouth UK.

NAME OF PROJECT

Mast House

CLIENT

T Clarke

DETAILS

- HOUSING SECTOR
- ATKORE UNISTRUT CHANNEL & ATKORE MARCO STEEL WIRE CABLE TRAY
- SEPTEMBER 2022
- PLYMOUTH

DESCRIPTION

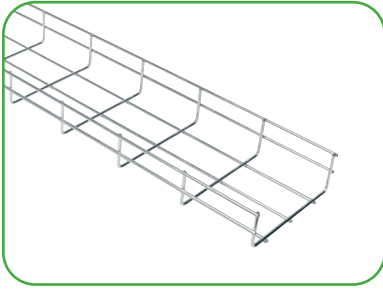

As part of this project, T Clarke had completely gutted the existing interior and services on the 5th floor plates and core areas.

The fit out included completely new services including a new incoming mains upgrade, electrical distribution, LED lighting, small power and data cabling.

Atkore Unistrut & Marco supplied Channel and Steel Wire Cable Tray as part of the installation.

Sam Bannister, Technical Sales Manager at Atkore Unistrut & Marco states, "Having a great working relationship with the contractor ensured I was aware of their expectations, and what was important to them throughout this project. Due to this, the project flowed nicely and it was a success."

As with all projects being delivered in these difficult times we had some tricky moments along the way, but with careful planning and some forward thinking we managed to complete the works one month ahead of programme, both Landlord and tenant were very impressed with our team work and can do attitude towards the project. Sam also worked with us providing great service, we certainly look forward to working with him again in the future.

Gary Tidball, Divisional Director
